
TITANIUM POOLS

A TILE POOL, BUILT IN A FACTORY, SET IN A DAY

Titanium Pools arrive complete — welded steel, coated, and hand-tiled before they ever reach your yard.

Most of the risk in a pool is in how it gets built

A traditional pool is manufactured in your backyard, by hand, in the weather, over several months. A Titanium pool is manufactured in a shop in Texas and delivered finished.

That single difference is where everything else comes from: the shorter schedule, the smaller mess, the finish quality, and the fact that there is no shell to crack and no surface to redo in ten years.

One piece of steel

The shell is welded as a single unit. There are no seams or joints anywhere in it, so there is nothing to separate, leak, or move apart over time.

Sealed three ways

An industrial epoxy coating on the outside — the kind used on oilfield equipment — plus epoxy mortar and epoxy grout behind the tile inside.

Real tile, everywhere

Hand-laid 1" tile across the entire interior, not just a waterline band. It is the finish luxury pools use, installed in a shop instead of your yard.

How it compares

Three ways to put a pool in a backyard, and what each one asks of you.

	Gunite / concrete	Fiberglass & drop-in	Titanium
Built where	In your yard, over months	In a factory	**In a factory, fully tiled**
Typical timeline	Three to six months, weather permitting	Several weeks	**A few weeks, with the pool set in one day**
Interior finish	Plaster, or tile at a steep upcharge	Gelcoat or vinyl liner	**Hand-laid tile throughout, included**
Finish lifespan	Plaster is refinished periodically	Gelcoat fades and chalks; liners get replaced	**Tile is permanent**
Structural risk	Cracking, and concrete can suffer ASR	Can flex, bulge, or warp	**Welded steel — no cracking, flexing, or ASR**
Disruption to your yard	Heavy: crews, trucks, and open ground for months	Moderate	**Short and contained**
Look	Fully custom	Molded shapes, visible seams and steps	**Clean rectangular geometry, resort-style finish**

The finish is the part people notice

Hand-tiling a traditional pool can push the cost up by half or more and add weeks to the build, which is why most pools are plastered instead.

Titanium tiles every pool at the factory as standard. You get the finish that reads as a high-end custom pool, without the custom-pool bill or the extra weeks on site.

Tile is also the most durable interior there is. It does not chalk like gelcoat, it does not need replacing like a liner, and it does not get refinished like plaster. It simply stays.

Nine tile options. Colors shown are approximate — ask to see samples.

The same pool reads as custom against traditional architecture.

TITANIUM POOLS

How it goes in

Four stages. The pool itself is the fastest part.

STAGE 1 – 2

Excavate, then deliver

We open the hole and build a compacted stone base. Your pool leaves the factory finished and arrives on a flatbed, tile and all.

STAGE 3

Set it

A crane lifts the shell over the house and lowers it into place. This is the day the pool goes in — and it usually takes one.

Plumbing, coping and decking go in around a pool that is already finished inside.

STAGE 4

Connect and finish around it

Plumbing, equipment, coping, and decking. Because the interior is already done, there is no plaster to cure, no liner to fit, and no waiting on finish work before you can fill it.

1 day
Typical time to set the pool once it is on site

A few weeks
Typical time from breaking ground to swimming

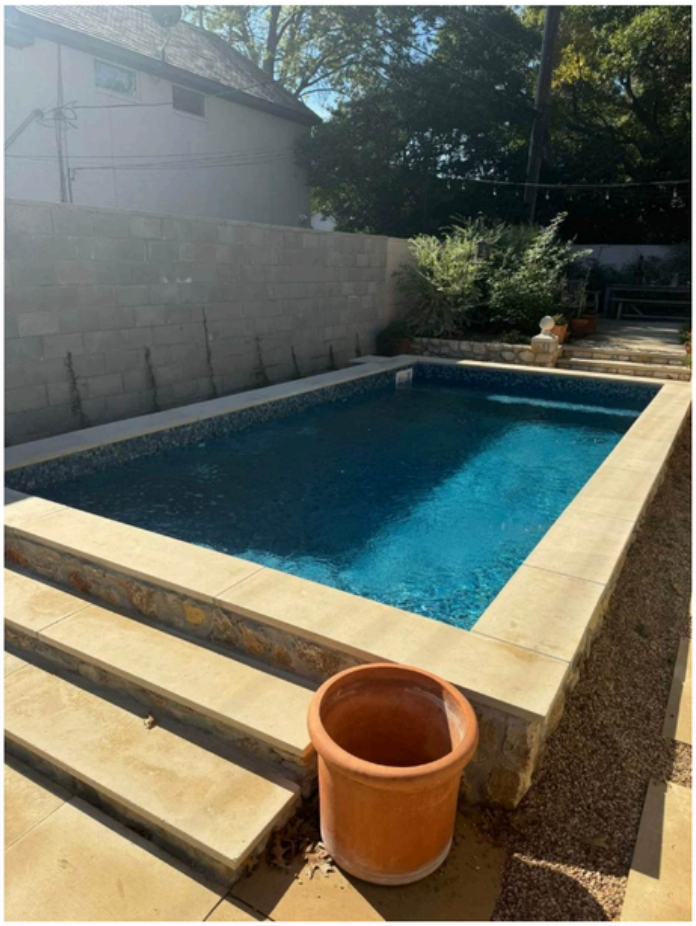
Compare that with a gunite build, where the shell is sprayed, cured, tiled, plastered, and filled across a season — with your yard open the entire time.

Sized for a real backyard

Five standard sizes, every one of them a uniform four feet deep — the right depth to swim, float, play, or stand and talk.

MODEL	Size	Best for
Core	16' × 8'	Compact yards, courtyards, and city lots
Original	20' × 8'	More swim length on a narrow footprint
Horizon	20' × 10'	The most versatile size; room for seating
Summit	25' × 10'	A true backyard centerpiece
Premier	23' × 13'	Includes a built-in 7' × 7' spa

Sizes are semi-custom, so length, width, and depth can be adjusted, and tanning ledges and spas can be added to any model. If your yard is an awkward shape, that is a conversation, not a dead end.



Set partly above grade with stone veneer, on a yard that steps down.

In the ground, partly raised, or above it

Your pool does not have to sit flush with the lawn. It can be installed fully in-ground for a traditional look, partly recessed on a sloped yard, or raised as an architectural feature with veneer or decking around it.

On a sloping or tight lot, that flexibility is often what makes a pool possible at all — and it is decided in design, before anything is ordered.

COMPACT LUXURY

Core

16' x 8' Steel Pool

The Titanium Core is the perfect entry into luxury steel pool ownership. At 16' x 8', this model fits beautifully into smaller yards while still delivering a true pool experience - not just a plunge tank. Ideal for cooling off, relaxing after work, or adding a focal point to your outdoor living space, the Core offers modern lines, premium tile finishes, and structural strength that traditional pools simply can't match.

Specifications

INSTALLATION	Less than 5 weeks
DEPTH	4'
SIZE	16' x 8'

What's Included Standard

- 3' step
- Internal high-performance coating
- 1 inch hand-laid tile throughout

multiple options shown in picture above

DESIGN MY POOL (16 x 8)

Great value with all the benefits!

Built for a faster, cleaner path to your backyard.

VERSATILE FOOTPRINT

Original

20' x 8' Steel Pool

The Titanium Original adds extra length while maintaining a compact footprint, making it one of the most versatile models in the lineup. The added swim length gives you more room to stretch out, float, and entertain - while still fitting comfortably in most suburban lots. It's the perfect balance between efficiency and usability.

Specifications

INSTALLATION	Less than 5 weeks
DEPTH	4'
SIZE	20' x 8'

DESIGN MY POOL (20 x 8)

Great value with all the benefits!

Built for a faster, cleaner path to your backyard.

FULL-POOL PROPORTIONS

Horizon

20' x 10' Steel Pool

The Titanium Horizon steps into true full-pool territory. At 20' x 10', this model delivers the space, proportions, and presence of a traditional backyard pool - without the long construction timeline or structural risk. This is where Titanium pools start to feel like a backyard centerpiece, not just an add-on.

Specifications

INSTALLATION	Less than 5 weeks
DEPTH	4'
SIZE	20' x 10'

What's Included Standard

- 3' step

DESIGN MY POOL (20 x 10)

Great value with all the benefits!

Built for a faster, cleaner path to your backyard.

BACKYARD CENTERPIECE

Summit

25' x 10' Steel Pool

The Titanium Summit is built for homeowners who want the ultimate backyard pool experience. At 25' long, this model delivers real swim distance, strong visual impact, and the feeling of a true resort-style pool - while still benefiting from Titanium's fast installation system. If you want your pool to be the main feature of your backyard, this is it.

Specifications

DESIGN MY POOL (25 x 10)

Great value with all the benefits!

Built for a faster, cleaner path to your backyard.

EXTENDED SWIM LENGTH

Atlas

30' x 10' Steel Pool

For homeowners who want even more swim length, the 30' x 10' configuration stretches the Titanium experience into a longer, more dramatic backyard feature. It keeps the clean rectangular geometry and fast-install approach while creating additional room for swimming, entertaining, and everyday use.

Specifications

INSTALLATION	Less than 5 weeks
DEPTH	4'
SIZE	30' x 10'

Great value with all the benefits!

Built for a faster, cleaner path to your backyard.

FAN FAVORITE

Premier

23' x 13' Steel Pool

A fan favorite for homeowners who want a complete resort-style setup, the 23' x 13' Premier combines a generous pool footprint with standout design features that create a true backyard centerpiece. The larger width creates a substantial backyard presence while keeping the clean lines and factory-built finish that define Titanium Pools.

Specifications

INSTALLATION	Less than 5 weeks
DEPTH	4'
SIZE	23' x 13'

What's Included Standard

- 5' tanning ledge
- 3' steps
- Internal high-performance coating
- 1 inch hand-laid tile throughout

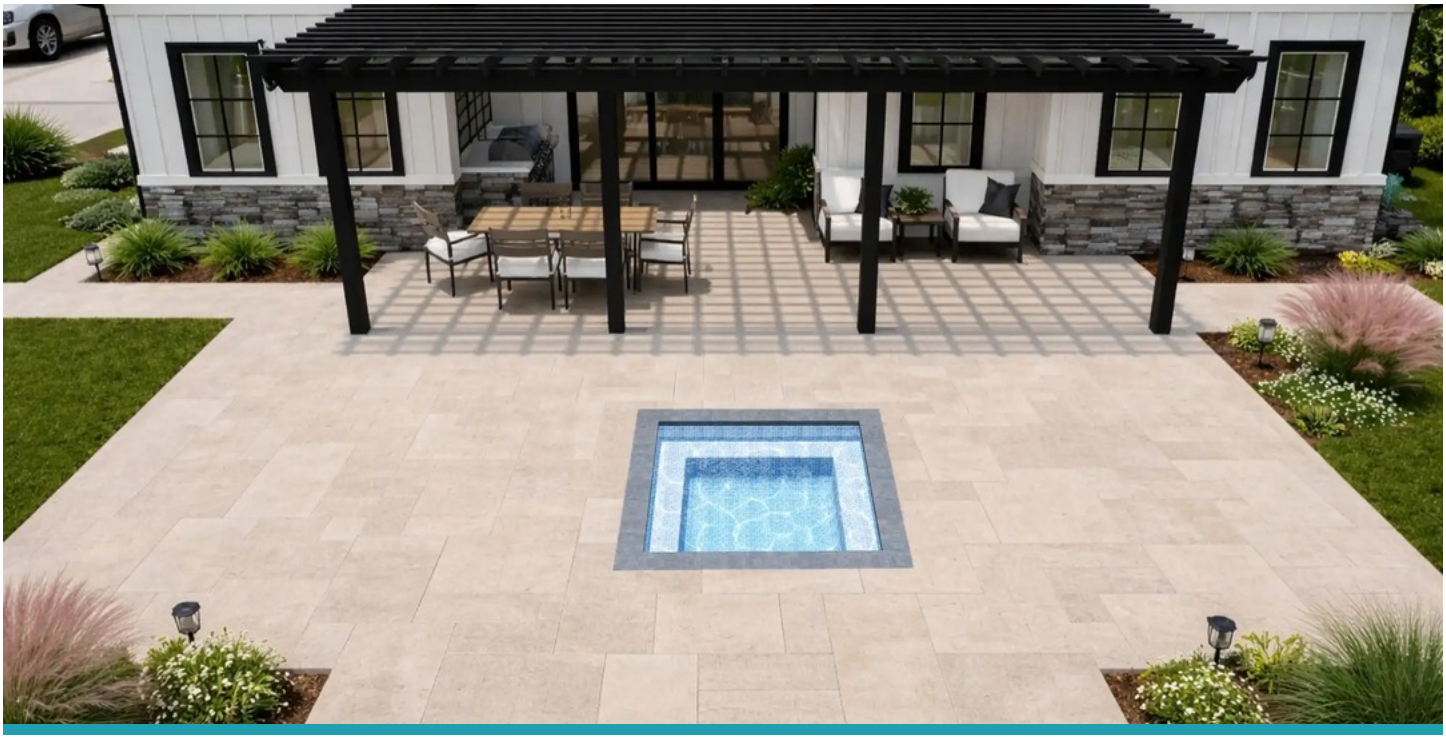
Great value with all the benefits!

Built for a faster, cleaner path to your backyard.

STANDALONE SPA

Spa Only

7' x 7' Steel Spa



The 7' x 7' spa-only configuration gives you the Titanium look and factory-built approach in a compact standalone format. It's designed for homeowners who want a dedicated place to relax, unwind, and add a premium water feature without committing to a full pool footprint.

Specifications

CONFIGURATION	Spa only
SIZE	7' x 7'

What's Included

- Factory-built steel construction
- Premium tiled finish
- Made to order and delivered to you

DESIGN MY SPA (7 x 7)

Great value with all the benefits!

Built for a faster, cleaner path to your backyard.

TITANIUM POOLS

What you will not be dealing with

- **Refinishing.** No plaster to redo, no gelcoat to restore, no liner to replace on a schedule.
- **Cracking.** A welded steel shell does not crack the way concrete does, and it cannot suffer ASR.
- **Soil movement damage.** The structure is one rigid piece rather than a poured shell that has to resist the ground on its own.
- **A season of construction.** Your yard is open for weeks, not months.
- **Surprise finish costs.** Tile is standard, not a line-item upgrade.
- **A pool that looks prefab.** Once the coping and deck are in, nothing about it reads as a drop-in.

No pool is maintenance-free — you will still balance water and clean a filter. But the things that make pool owners groan a decade in are mostly designed out of this one.

Let's look at your yard

The first step is simple: we visit, measure, look at access for the delivery and the crane, and tell you honestly which sizes will work and which will not.
